How Google Summer of Code Works

Propose a project for approval by a participating open source organization

Code the summer away

Achieve Ultimate Glory (and get a nice paycheck)

Google Summer of Code is a global program that offers students stipends to write code for open source projects. We have worked with the open source community to identify and fund exciting projects for the upcoming summer.

PROGRAM TIMELINE

Kickoff FEBRUARY

Org Application Starts: March 18 at 19:00 UTC

6 days, 7 hours remaining

This page contains the general information about the Outreach Program for Women internships. At the moment, it describes the current round that is taking place from January 2 to April 2, 2013. The information about the next round which will take place from June 17 to September 23, and have an application deadline on May 1 will be added soon.

This page contains general information about the application process, and the linked organizations' pages have information about projects and mentors.

Here is the page with the resources that were used to help us spread the word for the current round.

Schedule

- November 14: program announced and application form made available
- November 14 December 3: applicants need to get in touch with at least one project and make a contribution to it
- December 3: application deadline at 11:59pm GMT
- December 11: accepted participants announced on this page at 8pm GMT
- January 2 April 2: internship period

Accepted Participants

Congratulations to all accepted participants! These internships were made possible by the generous sponsorship from participating organizations, as well as from Elego, Google, Rackspace, and Red Hat! Here is the <u>press release</u> about the growth of the program.

The 25 accepted participants, as well as their IRC nick, location, project, and mentor(s) are listed below. The name of each participant links to her blog.

The blog posts of all participants are aggregated on the Women in Free Software Planet. Each participant's blog is also aggregated on the Planet relevant to her organization. The participants are asked to blog about their work at least every two weeks.

Google Policy Fellowship

We are now accepting applications to the 2013 Google Policy Fellowship in Africa, Europe, Latin America and North America.

"It was a complete privilege to work with such smart, passionate and fun people; to be able to participate in important debates with several organizations, and to do research with full academic freedom. I am proud of being a Google Policy Fellow"

-Marcel Leonardi (EFF)

Program overview

The Google Policy Fellowship program was inspired by Google's Summer of Code with a public policy twist. The Google Policy Fellowship program offers undergraduate, graduate, and law students interested in Internet and technology policy the opportunity to spend the summer contributing to the public dialogue on these issues, and exploring future academic and professional interests.

Fellows will have the opportunity to work at public interest organizations at the forefront of debates on broadband and access policy, content regulation, copyright and trademark reform, consumer privacy, open government, and more. More information about the host organizations and the areas of focus for the fellows are outlined here.

Fellows will be assigned a lead mentor at their host organizations, but will have the opportunity to work with several senior staff members over the course of the summer. Fellows will be expected to make substantive contributions to the work of their organization, including conducting policy research and analysis; drafting reports and analyses; attending government and industry meetings and conferences; and participating in other advocacy activities.

Who should apply?

We're looking for students who are passionate about technology, and want to spend the summer diving headfirst into Internet policy. Students from all majors and degree programs who possess the following qualities are encouraged to apply:

- Demonstrated or stated commitment to Internet and technology policy
- · Excellent academic record, professional/extracurricular/volunteer activities, subject matter expertise
- · First-rate analytical, communications, research, and writing skills
- · Ability to manage multiple projects simultaneously and efficiently, and to work smartly and resourcefully in a fast-paced environment

Fellows will receive a stipend of \$7,500 for 10 weeks during the summer of 2013(June-August). Exact dates of the fellowship will be worked out by the fellow and host organization.

Security Mentorship

The Mozilla Security team is strongly committed to helping to develop a community of security contributors through our Champions program, but some individuals may be interested in a more structured approach to contribution, or may want to participate in a goal oriented program that will allow them to develop skills while helping further our mission. The Security Mentorship program at Mozilla provides that opportunity.

Birinci dönem başvuruları başladı 🥒

Yakıdan Eğitim'in 11-22 Mart tarihleri arasında sürecek birinci dönem başvuruları aşağıdaki 10 proje ile başladı:

- Necdet Yücel Linux için kimlik kanıtlama aracı: yekk
- Fatih Özavcı MBFuzzer : Mobil Uygulamalar için MITM Fuzzer
- Emre Yüce VirtLabNet Sanal Lab Ağı
- Oğuz Yarımtepe Kötü amaçlı yazılım görsellemesi: malwarez
- Engin Manap Picassa Tagger
- Mesutcan Kurt NAR: New Album Reporter
- Erdem Bayer EN-LinuxClipper Evernote için Linux Masaüstü Kırpma Uygulaması
- Kaan Özdincer Couchbase Nagios Plugin
- Serdar Yiğit NfQuery Syslog Desteği ve Genel İyileştirmeler
- Murat Soysal Gerçek Zamanlı Yoğun Veri Akışı Harita Görsellemesi

Projelerle ile ilgili soru ve önerileriniz için Yakından Eğitim Açık Listesi grubunu veya Freenode IRC sunucusunda #yakındanegitim kanalını kullanabilirsiniz.

Bu projelerde çalışmak için konuların hepsine hakim olmanız gerekmediğini, Yakından Eğitimin hedefinin sizin gelişim sürecinize katkıda bulunmak olduğunu bir kez daha hatırlatmakta fayda var. Başvuru yöntemi hakkında daha önce yazdığımız yazı size kılavuzluk edecektir. Yine de tereddütte kaldığınız şeyler hakkında yazmaktan çekinmeyin.
